1. I'm fully committed to green space protection.
2. Yes I fully support the city protecting an additional 1000 acres of space for parks as soon as possible.
3. I supported it and will continue too!

Thanks,

Cindy

Dear Councillor Gilroy

We highly commend Winnipeg's City Council that approved key planning documents in May 2022 with the following amendments.

- creation of a Master Greenspace and Natural Corridor Plan By-law,
- a Biodiversity Policy, and
- acquisition of an additional 1,000 acres of public park land

These forward thinking plans and policy will preserve green space and set guidelines that protect and plan for greenspace for the future.

Progress is being made by the City with budget allocated and work started on the Master Greenspace and Natural Corridor Plan and Biodiversity Policy.

We ask for your continued support to ensure these amendments are implemented in a timely manner.

To give citizens an opportunity to learn what all the candidates are saying would you please respond to the following three questions?

Please provide a few lines for our website that could indicate your aspirations, vision, commitment, timeframe, and achievements - what you want to tell the public about these three items.

1. Describe your commitment to ensure the Master Greenspace and Natural Corridors (includes river corridors) Plan By-law and Biodiversity Policy will be completed and implemented in a timely manner?

2. Describe your commitment and time frame to acquire 1000 additional acres of public parkland in the City of Winnipeg while greenspace is still available.

3. Describe your commitment to implement a Biodiversity Policy?

Background and detail for the questions can be found at - www.ours-winnipeg.com/election-2022.html

We do not endorse candidates but will seek candidate positions and compile relevant information on our webpage to inform voters.
