Hi Pam

Thanks a lot for your mail.

I appreciate your efforts and initiatives u are taking by spearheading voice of Winnipeg on this matter. We do need to educate masses and spread more awareness because this is very significant. We cannot afford to ignore this.

I am myself in favour of this particularly in today's world where climate change has become obvious given shrinking green spaces and carbon emissions. Even this is big concerns had been reflected at important fora like United Nations.

I assure you we will definitely keep in mind this important issue and do whatever is possible within our means and tools available.

Thanks again
