Hi Pam and Ron, thanks for reaching out.

Greenspace conservation is a main part of my campaign pledge should I win the St. Vital councillor race, so these topics fall right in line with my thinking.

First question, I would work to ensure that the by-laws needed would be created and enforced within my 4 year mandate, should I win. Realistically I would like to see it happen sooner rather than later (2 years would be ideal), but I will be pushing for it.

Second, I am committed to securing more greenspaces. One thing I have heard from many constituents is a need for more bio reserve spaces. As for a specific time-frame for procurement, I'm not sure I can give one. But it is a priority.

Third, I am absolutely committed to a Biodiversity Policy. From the tree canopy issue, to heat islands, to infrastructure issues, many things can be tied to and helped with a proper Biodiversity Policy, so I am on board with that.

I hope this helps,

Derrick Dujlovic
