Subject: Re: Greenspace Matters

Hi Pam and Ron,
I've always been supportive of the work OURS does - and will continue to be AND will make a concerted effort to help educate the new Councillors - you are doing amazing work - keep it up!
not sure if you are aware - I brought forward a motion to ensure MORE park space in denser developments -

the Development Agreement Parameters are being worked on right now with City and Developers - IMO - this is a CRITICAL document - it has not been updated in ? 20 years (not 100% I will have to look - but WAY too long)

I brought forward many motions to ensure changes - one being if you are making neighbourhoods denser - change the green to people ratio for parks -

it will be CRITICAL that there be some kind of public involvement - yet - to date - current Mayor has not committed to any public involvement. IMO - this is one of the most critical documents we have to focus on this term.
